

PRESS RELEASE

Paris, May 31, 2010

Inauguration of the Quickborn Consulting Ireland Office

Quickborn Consulting LLC is pleased to announce the inauguration of its Ireland Office, Quickborn Technical Services Ltd, in Dublin to service the growing demand for its support services in the region.

Quickborn Consulting has been present in Ireland since 2006 through its retail customer base and through its strong relationship with Oracle Retail. The new office expands Quickborn's ability to offer local support services to Arnotts, and its growing base of customers in the region. Dublin was chosen by Quickborn Consulting as an advantageous base both for its geographical proximity to several key client sites and the cultural and language that make it easier to integrate into our global framework.

"We have seen significant growth in our customer base and level of interest in our services and solutions," said Gábor Tózsér, founder and CEO of Quickborn Consulting. "We are expanding our commitment and local resources to support our customers in ensuring the reliability and performance of their software solutions. The Dublin office will allow us to deliver superior support to our customers in Ireland and in the EMEA region."

Quickborn Consulting is a Gold-level member of the Oracle PartnerNetwork.
